---

One edit, should this be PWS instead of CWS. The number of CWS contacted 2252 is greater than the number of CWS 2175 in the affected area:

“Of the approximately 4500 water systems that were initially projected to be impacted by Hurricane Harvey, approximately 3607 systems were in the affected area (58 State Declared Counties).

Of the systems in the affected areas, 2175 are community water systems that serve a population of 10,878,982, and 596 are non-transient non-community water systems that serve hospitals, health care facilities, nursing homes, and day cares, with a population of a 216,871.

Currently the EPA and TCEQ have made contact with 2252 community public or CWS + NTNC water systems and have confirmed 1507 are fully operational and servicing water to a population of 9,523,362. As of September 4<sup>th</sup>, 2017 4PM, there are 148 systems that have reported being on a boil water notice and 50 have reported a water outage.

This narrative is very informative in my opinion. Would suggest putting a % after population served with fully operational water systems (9,523,362 or 87.5%).

Notes:

1. There are two counties in the 58 counties that are not loaded – Leon and Madison. These counts do not reflect systems in these counties

**Subject:** M6H1 – Harvey Response: need for "9AM" report today Now

Joe,  
TCEQ needs  
Numbers where the XX's are Now for their press report.

I did not understand this need when we talked this AM.

“Of the approximately 4500 water systems that were initially projected to be impacted by Hurricane Harvey, approximately 2200 systems were in the affected area.

Of the systems in the affected areas, xxxx are community water systems that serve a population of xxxx, and xxxx are non-transient non-community water systems that serve hospitals, health care facilities, nursing homes, and day cares, with a population of a.

Currently the EPA and TCEQ have made contact with xxxx community water systems and have confirmed they are fully operational and servicing water to a population of xxxxx. As of xxx, there are xxx systems that have reported being on a boil water notice and xxx have reported a water outage.
